Vasstinden - 6 km R/T

After a relatively short drive from Tromsø city centre, you will find Vasstinden in the beautiful Kattfjorden. Vasstinden is a steep summit that pays off for every step towards the top. A lovely view reveals itself after passing the tree line. At the top, you stand at 900 MASL. Enjoy the view of Kattfjordeidet and the neighbouring summits Nordfjordtinden and Blåskredtinden, as well as the islands Sommarøya, Hillesøya, Håja and Tussøya. In fine weather you can see parts of Senja.

Vasstinden

Trail description

After only a short uphill you will get a great view over the fjord from Bærmarhaugen (150 MASL). There is a steady and relatively steep ascent through the woods along the mountain ridge until it levels out at around 440 MASL. Here the path divides. The path leading right is the most common way up to Vasstinden. The path leading left is an alternative unmarked route that takes you by Kvitorvatnet to Vasstinden. To fill water, follow the path a hundred meters to the left. When taking the marked route you will gradually encounter rockier and steeper terrain. Follow the south ridge to the top.
