## Stortinden, Reinøya, 4 km (R/T)

Approaching Stortinden peak on Reinøya island, you get a great view from the top. From Reinskar's ferry dock, you immediately start the steep incline, but it isn't long before your toil is rewarded with a view. At the top of Stortinden you are 568 MASL and you can enjoy a great view of Reinøya's mountains and valleys. In the south-west direction Ringvassøya towers with its mighty mountains, among them the highest mountain in the municipality, Soltindan. To the north, you will see Vannøya and Vanntinden.

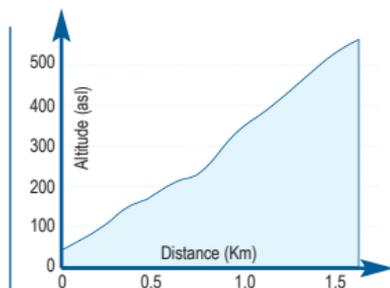

P

Leave the car at the ferry dock on Hansnes and take ferry over to Reinøya.

# Stortinden, Reinøya

## Trail description

Drive to Hansnes, and take the ferry to Reinøya. Follow the route out from the ferry dock and cross the road. The path starts right above the road to the right of the house there. Follow the service road until you hit the path. The path is a bit unkept through the woods, but it keeps to the left until you reach a small intersection. Follow the sign labeled "Flata". You will come to a water spring, locally referred to as the fountain of youth. When you exit the woods follow the ridge to the right of the peak all the way up. Have a good trip!
